Karol Bagh, New Delhi

Technically advanced Java Developer with over 3 years of experience in developing, designing, and delivering user-centric software applications using Java technology. Offering expertise in multiple technology, including Spring Boot, JavaScript, Angular, and HTML. Seeking to secure a challenging position as a Java Developer.

PROFESSIONAL EXPERIENCE

PRP Services - Java Developer
Sep 2021 - Current

- Worked on the development of various modules, including LMS , WhatsApp Campaigner, Chatbot, Longcode, and Water Bill Generation, for an application.
- Developed and maintained the backend infrastructure of the application, ensuring its smooth operation and scalability.
- Wrote clean, maintainable, scalable, and tested code for 5+ applications.
- Adhered to standards and best practices, ensuring 100% compliance in development processes, coding, and peer reviews.
- Supported the technical services team of 7 to resolve customer problems, maintain quality standards, and ensure the responsiveness of applications.

PROJECTS

Whatsapp Campaigner - Lead Developer
May 2023 - Current

- Coding using Java, SQL , Threading concepts, Collections Framework,Spring Framework, Hibernate Framework, IntelliJ IDE.
- Preparing and creating design documents for Action Classes and Utility Classes. Involved in Integration of Modules..
- Writing and calling Stored Procedures for the application.
- Unit testing and Performance Tuning of various parts of the application.
- Building Rest-APIs for data processing.
- Build UI with Angular and consuming Rest-APIs.
- Debugging modified code as per the requirement.

WATER BILL GENERATE - Lead Developer
Feb 2023 - April 2023

- Designed and planned the execution of Water Bill Generate.
- Built the logic for managing customer payments, including direct payments, payment history, notifications, and other project-related tasks.
- Utilized Java, MySQL, threading concepts, Collections Framework, Spring Framework, Hibernate Framework, and IntelliJ IDE in the development process
- Prepared and created design documents for action classes and utility classes.
- Building REST APIs for data processing.
- Built UI with Angular and consumed REST APIs, debugging and modifying code as per the requirements

ChatBot - Developer

- Coding using Java, SQL , Threading concepts, Collections Framework,Spring Framework, Hibernate Framework, IntelliJ IDE.
- Preparing and creating design documents for Action Classes and Utility Classes. Involved in Integration of Modules.
- Writing and calling Stored Procedures for the application.
- Unit testing and Performance Tuning of various parts of the application.
- Building REST APIs for data processing.
- Built UI with Angular and consumed REST APIs, debugging and modifying code as per the requirements

Dec 2021 - Feb 2023

Lead Management System - Developer

- Designed and planned the execution of Water Bill Generate.
- Built the logic for managing customer payments, including direct payments, payment history, notifications, and other project-related tasks.
- Utilized Java, MySQL, threading concepts, Collections Framework, Spring Framework, Hibernate Framework, and IntelliJ IDE in the development process
- Prepared and created design documents for action classes and utility classes.
- Building REST APIs for data processing.
- Built UI with Angular and consumed REST APIs, debugging and modifying code as per the requirements

EDUCATION

IIMT Groups of College - B.C.A

Greaterr Noida

Aug 2018 - June 2021

R.R.J.R.S.D College - Higher Secondary, P.C.M

Madhubani Bihar

April 2016- July 2018

SKILLS

- Java- Core, Microservices, Spring Boot Framework, Collection Framework;
- JavaScript- Angular ;
- Databases - MySQL, MongoDB;
- RabbitMQ;
- Docker;
- GitHub;
- OS - Linux, Windos;
